

Sports Sun Protection Policy

Toowong Football Club

PURPOSE

The following policy is in place to help Toowong Football Club reduce the UV exposure and skin cancer risk of our members and participants.

RATIONALE

The sun's ultraviolet (UV) radiation can't be seen or felt. Whatever the weather, it's important for people of all skin types to use sun protection whenever UV levels are three or higher.

Too much of the sun's UV can cause sunburn, skin and eye damage and skin cancer. Australia has one of the highest rates of skin cancer in the world, with two in three Australians developing some form of skin cancer before age 70.

While playing or watching sport, people are exposed to the sun's UV for long periods of time.

Sporting clubs have a responsibility under health and safety legislation to provide and maintain a safe working environment for staff, volunteers, players and spectators. By minimising UV harms, we aim to fulfil this obligation and duty of care.

SUN PROTECTION TIMES

- To assist with the implementation of this policy, club officials, coaches and participants are encouraged to access the daily local sun protection times via the free [SunSmart app](#) or at sunsmart.com.au.
- The sun protection measures listed are used for all outdoor activities during the **daily local sun protection times**. The sun protection times are a forecast from the Bureau of Meteorology for the time of day UV levels are forecast to reach 3 or higher. Queensland's UV Index is 3 or higher all year round.
- A combination of sun protection measures are needed during the daily local sun protection times.

SCHEDULES, FIXTURES AND RULE MODIFICATION

- Where Toowong FC are responsible for organising, training and events are scheduled to minimise exposure to UV and heat.
- Cancellation of training, events or competition occurs according to the rules of [Football Queensland's Heat Policy](#) when high risk conditions are forecast.

Where it is not possible to avoid peak UV and heat periods, the following measures are considered to minimise risks:

- Warm-up activities are limited in duration and intensity.
- The duration of the activity is reduced.
- Rest breaks and opportunities to seek shade and rehydrate are increased.

Sports Sun Protection Policy Toowong Football Club

- Officials rotate out of the sun more frequently than usual.
- Player interchange and substitution is used more frequently than usual.
- Officials, coaches and senior members act as role models by wearing sun-protective clothing and hats, applying sunscreen and seeking shade wherever possible.

SUN PROTECTION MEASURES

1. Clothing

- Sun-protective clothing is included as part of on and off-field uniform and uniform for officials and volunteers.
- Jerseys are made from UPF (UV Protection Factor) 30+ material.
- Jerseys are loose-fitting and lightweight.
- Where the competition uniform does not provide adequate sun protection, participants are reminded to apply SPF30 (or higher) broad-spectrum, water-resistant sunscreen to all exposed skin and wear covering clothing whilst not on the field.

2. Sunscreen

- SPF30 (or higher) broad-spectrum, water-resistant sunscreen is promoted and provided to participants.
- Participants are encouraged to apply sunscreen 20 minutes before training or playing and to reapply every two hours.
- Sunscreen is stored below 30°C and replaced once it is past the expiry date.
- Participants are encouraged to apply a generous amount of sunscreen (the equivalent of one teaspoon per limb).

3. Hats

- Bucket hats are available to purchase as part of the on and off-field uniform (even if they can't be worn in actual play outside of Miniroos).
- Caps and visors do not provide adequate sun protection to the face, ears and neck and are not recommended for extended sun protection but may be used, in combination with sunscreen on parts of skin not covered, as an interim measure for on-field play or training.

4. Shade

- An assessment of existing shade has been conducted at commonly used outdoor venues.
- When not actively playing or between individual events, participants are able to rest in shaded areas.
- Where there is insufficient natural or built shade, temporary shade structures are provided or participants are notified to bring their own temporary shade (e.g. tents or umbrellas).
- Shade from buildings, dugouts, and trees is used where possible (e.g. for player interchange, marshalling areas, spectator areas).
- Marshalling, interchange and presentation ceremony areas are protected by shade.
- Participants and officials rotate to cooler, shaded areas.

Sports Sun Protection Policy Toowong Football Club

EDUCATION AND INFORMATION

- The times when sun protection is required (as determined by SunSmart's daily local sun protection times) are communicated to participants and spectators.
- Certain health conditions and medications mean some people are more sensitive to UV radiation and need to use sun protection at all times regardless of the UV levels. For further information visit [Risk factors for skin cancer](#).

REVIEW

- This sun protection policy will be reviewed regularly.
- This policy was last updated on 15 November 2021.
- Next policy review: 30 November 2023.
